Product Safety Policy Statement

The Magnet Group (hereinafter referred to as TMG) is dedicated to providing its customers with safe products that exceed their expectations for quality and safety, designed to comply with all statutory and voluntary standards and regulations. We have assembled an executive level Product Safety and Compliance Team which is comprised of Senior Managers from Purchasing, Production, Operations, and Marketing that report directly to company Ownership and together have developed strict policies to deter, detect and prevent non-compliant product from shipping to a customer. The foundation of these policies is based upon open daily communication internally and with our sourcing partners throughout the supply chain. Procedures have been established for product design and performance as well as raw material certification, regulatory requirements, traceability and the validation of communication leading up to the Design Approval Process. Additional procedures are in place for internal and external testing ending with manufacturer based and domestic inspections as well as a protocol for recall should the need arise.

While it is important to note TMG products are NOT intended for children under the age of 12, but for use by businesses and individuals as general use promotional items, we do certify that these products comply with all applicable Consumer Product Safety Improvement Act (CPSIA) safety rules, bans, standards and regulations.
